ING Belgium

Re: Product Owner & Senior Risk Data Journey Expert, Credit Infrastructure

Dear ING Hiring Team,

I am applying for the **Product Owner & Senior Risk Data Journey Expert role in Credit Infrastructure**. The split between leading an agile squad and shaping the credit risk data landscape is close to how I have worked for years: product ownership on one side, and deep credit risk and regulatory data work on the other.

My foundation is in the same domain as your team. At **HSBC and Credit Suisse** I worked on **CCR, EAD, CVA, RWA and Basel Pillar 3** reporting: data lineage, source-to-target mapping, BRDs and FRDs, and delivery with risk and engineering squads. At Credit Suisse I led agile delivery for the **Counterparty Credit Risk data team** through post-Brexit regulatory change. At **Standard Bank** I worked on risk systems and regulatory reporting pipelines. That background maps directly to PD, EAD, LGD and credit risk engine work.

At KBC in Brussels I owned the **Basel IV and AnaCredit calculation engine backlog** against mandatory **NBB and ECB** deadlines. I worked daily with risk, data management and IT, ran sprint rhythms with product owners and scrum masters, and kept regulatory reporting windows on track. I also owned a product backlog as Product Owner at Uplight. At iostering I coach product owners and squads and work closely with clients in the **investment banking domain** on credit risk and regulatory delivery.

I am a Belgium resident and will return from India shortly. I am **legally authorized to work in Belgium and do not need a work permit**. I work in English and Dutch. I would welcome a conversation about how I can help your Credit Infrastructure team deliver regulatory change and improve the credit risk data landscape.

Yours sincerely,

Anjish Bhondwe
