Location: Pune, India

Languages: English (C1); German (B1); Dutch (A1/A2)

## Education

|           |                                                                                                                                 |        |
|-----------|---------------------------------------------------------------------------------------------------------------------------------|--------|
| 2018–2022 | <b>HTW Dresden (Hochschule für Technik und Wirtschaft), Germany</b><br>Master of Engineering (M.Eng), Environmental Engineering | 2.8    |
| 2014–2017 | <b>Savitribai Phule Pune University, India</b><br>Bachelor of Engineering (B.E), Civil Engineering                              | 65.26% |
| 2010–2014 | <b>Maharashtra State Board of Technical Education (MSBTE), India</b><br>Diploma, Civil Engineering                              | 68.11% |
| 2010      | <b>Maharashtra State Board (MSBSHSE), India</b><br>10th Standard (Secondary School Certificate)                                 | 82.55% |

## Materials & laboratory testing

- **India (Diploma & B.E. Civil):** concrete, aggregates/sand, steel, soil and water labs, including slump (IS 1199); cube compressive strength (IS 516); aggregate and sand sieve analysis (IS 2386 / IS 383); cement tests (IS 4031); steel tensile and bend tests (IS 1608 / IS 1786); Proctor compaction and Atterberg limits / grain-size analysis (IS 2720 Parts 4, 5, 7/8); water tests for construction and environmental labs (IS 3025 / IS 456 where applicable).
- **Germany (HTW Dresden):** Construction Materials (B663); Geotechnical Project (B634); Water, Air and Soil Analysis (B626) laboratory practicals; Soil Management; Water and Wastewater Treatment; Solid Waste Management and Recycling.

## Professional Experience

|                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Jun'24 – Present | <b>Career Break · Belgium &amp; India</b> <ul style="list-style-type: none"><li>• Planned career break for parenting newborns, spanning relocation from Belgium to India. Alongside family responsibilities, kept learning on <b>construction materials</b>, circular construction, soil/water topics and GIS (Google Earth Engine), preparing for doctoral research in materials and structures.</li></ul>                                                                                                |
| Aug'23 – Jun'24  | <b>Civil &amp; Environmental Project Consultant, iostoring, Belgium</b> <ul style="list-style-type: none"><li>• Worked with a construction partner on a circular construction hypothesis: how Agile project management can bring <b>circular practices</b> into day-to-day delivery.</li><li>• Helped the IT engineering team understand civil project planning and designed workflows for waste management and circular-economy processes.</li></ul>                                                      |
| Nov'22 – Aug'23  | <b>Project Engineer, Hive CPQ, Ghent, Belgium</b> <ul style="list-style-type: none"><li>• Managed large product and technical datasets from manufacturers such as Pellenc, Mecatherm and Soproda.</li><li>• Turned complex client and manufacturer requirements into configurable <b>digital solutions</b>.</li><li>• Built low-code configurators with JavaScript, with a focus on usability and easy client management.</li><li>• Worked across data, stakeholder needs and digital solutions.</li></ul> |
| Jun'22 – Nov'22  | <b>Project Engineer, Aug.e, Brussels, Belgium</b> <ul style="list-style-type: none"><li>• Worked on smart-building and <b>digital-twin</b> projects that combined BIM with real-time building data.</li><li>• Monitored live electricity-meter data for energy performance and building operations.</li><li>• Used Revit, Navisworks and Neanex for BIM/model review and digital building information; supported data-driven energy management and sustainability work.</li></ul>                          |

## Master's Thesis

|                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|-----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Aug'21 – Sep'21 | <b>Agile Project Management in the Construction Industry</b><br><i>HTW Dresden, Germany · Master of Engineering (Environmental Engineering) · grade 2.5</i> <ul style="list-style-type: none"><li>• Explored how Agile can improve collaboration, continuous risk management, adaptive decision-making and resource efficiency in construction projects.</li><li>• Focused on careful use of resources and construction delivery practice; linked project organisation to environmental and materials-related outcomes.</li></ul> |
|-----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## Training

|        |                                                                                                                                                                                                                                              |
|--------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Oct'19 | <b>Trainee, Fraunhofer Institute, Dresden, Germany</b> <ul style="list-style-type: none"><li>• Planned a green business model for biogas-to-biowax demand; assessed EU sustainability policy, financials and transformation tools.</li></ul> |
|--------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## Technical Skills

|                            |                                                                                                                                |
|----------------------------|--------------------------------------------------------------------------------------------------------------------------------|
| <b>Materials / civil</b>   | Concrete, steel, soil and aggregate laboratory testing (IS practice); construction materials & geotechnical project work (HTW) |
| <b>Digital &amp; BIM</b>   | Revit, Navisworks Manage, Neanex, AutoCAD; digital twins                                                                       |
| <b>Geospatial / GIS</b>    | Google Earth Engine, QGIS, ArcGIS, ERDAS Imagine; remote sensing                                                               |
| <b>Data &amp; analysis</b> | Data modelling & integration, Tableau, MongoDB, Postman, Lucidchart, Excel                                                     |
| <b>Project &amp; Agile</b> | Jira, Confluence, Asana, Miro, Azure DevOps, Primavera P6; Scrum, Kanban (PSK I)                                               |
| <b>Environmental</b>       | Water, air and soil analysis; wastewater treatment concepts; solid waste and recycling                                         |

## Certifications

- Professional Scrum with Kanban (PSK I) · Scrum.org
- Google Earth Engine for Machine Learning & Change Detection
- Construction Management: Planning and Scheduling
- Primavera P6
- Excel Essential Training (Office 365 / Microsoft 365)

## Publications

“Design and Analysis of Building by AKSES and Manual Method.”

## Areas of Interest

- Characterisation and mechanical behaviour of construction materials
- Mechanics-driven design of high-performance and sustainable materials and structures
- Geotechnical and soil-related testing; construction waste and material reuse
- Life-cycle and environmental aspects of civil materials and infrastructure
