ING Belgium

Re: Product Owner & Senior Risk Data Journey Expert, Credit Infrastructure

Dear ING Hiring Team,

I am applying for the **Product Owner & Senior Risk Data Journey Expert role in Credit Infrastructure**. I am highly motivated to bring my banking experience from **Credit Suisse, HSBC, Standard Bank and KBC** into this role at ING. The job description matches how I have worked for years: lead an agile squad on credit risk engine delivery on one side, and stay close to the credit risk data landscape on the other.

On the Product Owner side, I own and prioritise **product backlogs**, run sprint rhythms with squads, and work daily with **Risk, Data Management and IT**. At **KBC** in Brussels I owned the Basel IV and AnaCredit calculation engine backlog against NBB and ECB deadlines. At Uplight I was Product Owner for a data product on Google Cloud. Since November 2024 at iostring I built the **delivery enablement practice and Agile Center of Excellence** and lead product owners and squads on investment banking credit risk delivery, including intake and capacity, SteerCo reporting, escalation when squads are blocked, and communication with risk and audit stakeholders.

On the risk data journey side, my depth sits in the same domain as your Credit Infrastructure team. At **HSBC and Credit Suisse** I worked on PD, EAD, LGD parameters, CCR, CVA, RWA and LLP-related reporting, credit risk engines, data lineage, source-to-target mapping and BCBS 239. I wrote BRDs and FRDs, designed data flows between risk and engineering, and led the Counterparty Credit Risk data team through post-Brexit regulatory change. At **Standard Bank** I worked on risk systems and regulatory reporting pipelines. At **KBC** I kept calculation engines aligned with regulatory requirements and supported data platform programmes alongside the reporting work.

I am a Belgium resident and will return from India shortly. I am **legally authorized to work in Belgium and do not need a work permit**. I work in English and Dutch. I would welcome an interview to walk through my experience in more detail and prove my fit for this role. Thank you for your consideration.

Yours sincerely,

Anjish Bhondwe
