Open to relocating to Amsterdam / the Netherlands. I do not need a work permit for Belgium or the EU.

---

## Professional Summary

Delivery and risk-technology leader with **13 years in regulated banking**. I run **Agile and Scrum project delivery**, write **strategic roadmaps and operating models**, and turn business needs into technology solutions across **Risk, IT and Data Management**. At KBC I led multi-country delivery for liquidity and regulatory programmes, prepared **SteerCo and senior governance packs**, and worked under **Basel, AnaCredit, GDPR and BCBS 239**. Earlier at Credit Suisse and HSBC I gathered and documented IT requirements for counterparty credit risk and capital data, and bridged risk teams with engineering on data quality and lineage. I bring **data governance** practice, **AI/GenAI awareness (AIGP)**, and calm stakeholder management when priorities compete.

## Core Skills

**Project and Agile delivery:** Scrum · SAFe · programme delivery · intake and capacity · dependency and risk management · PI planning

**Strategy and operating model:** roadmaps · target ways of working · CoE and enablement models · transformation backlog ownership

**Requirements to technology:** BRDs / FRDs · IT business requirements · solution design · source-to-target mapping · data models

**Governance and stakeholders:** SteerCo · senior management packs · Risk / IT / Data alignment · regulators and audit-ready artefacts

**Risk, data and regulation:** BCBS 239 · Basel Pillar 3 / Basel IV · AnaCredit · GDPR · CCR · EAD · CVA · RWA · data quality and stewardship

**Data and technology tools:** Collibra · data lineage and reconciliation · SQL-oriented analysis · AI / GenAI (AIGP) · delivery metrics tooling

## Experience

---

### Director for Agile Delivery Excellence

November 2024 to present

*iostring Technology and Consulting, India*

Delivery enablement for regulated financial services clients · India operation lead since Sep 2025

- Built the **Agile Center of Excellence** and delivery enablement practice from scratch: standard **Scrum and SAFe** ways of working, governance foundations and coach-the-coach paths across product, engineering and business operations.
- Wrote and owned the **transformation roadmap** and operating model for delivery: intake, capacity, ceremonies, metrics and escalation paths that product, risk-facing and technology teams share.
- Run **intake and capacity** end to end: capture demand, clarify scope, prioritise work, route to squads and keep delivery balanced against available capacity and competing priorities.
- Prepare leadership reviews with clear recommendations on delivery health, risks and mitigations; act as escalation point when squads are blocked across architecture, testing and programme management.
- Promote practical use of **AI and digital tools** in delivery work, with attention to governance and responsible use (AIGP).
- Since Sep 2025, manage the India operation: people management, performance, hiring, skills development and outsourcing partners.

### Delivery Lead

September 2021 to October 2024

*KBC Bank and Verzekering, Brussels and Leuven*

**Delivery Lead** for the Liquidity Reporting unit in a regulated banking tribe across Belgium, Hungary, Czech Republic and Bulgaria. Work sat between Risk, Data and IT on regulatory reporting programmes.

- Led **Agile and hybrid project delivery** for squads and trains across four EU countries: PI planning, tribe ceremonies, dependency management and portfolio alignment to regulatory deadlines.
- Owned **intake, capacity and prioritisation** across departments; managed competing demands from Risk, Data Management and IT while keeping liquidity reporting windows on track under **Basel IV and AnaCredit**.
- Built and delivered the **SteerCo and senior management picture**: delivery KPIs, risks, mitigations and recommendations for tribe leadership and governance forums.

## Experience (continued)

### Delivery Lead

September 2021 to October 2024

*KBC Bank and Verzekering, Brussels and Leuven (continued)*

- Ran **data governance and catalogue delivery with Collibra**, connecting stewardship, metadata and delivery teams so risk data was clearer and more reliable for reporting decisions.
- Delivered **GDPR implementation** for Corporate and Retail Banking alongside data-heavy regulatory reporting programmes.
- Coached the squad that delivered Kate Coin, a digital bank coin built under ECB constraints, with strong control and governance expectations.
- Managed performance, development, hiring and onshore-offshore partners across the federated setup.

### Product owner and manager, Carbon Zero

October 2020 to September 2021

*UST Global for Uplight, India (team across the US, Canada and India)*

- Owned a sustainability data product on Google Cloud: **roadmap, backlog and release plan**; prepared priority recommendations for the product director and VP of engineering.

### Lead Business Analyst

October 2019 to October 2020

*Credit Suisse, India*

Tier-1 investment banking: counterparty credit risk data, post-trade data quality and settlement lifecycle; post-Brexit regulatory change.

- Gathered, analysed and documented **IT business requirements** for risk data quality and reconciliation; translated needs into technology delivery with engineering squads.
- End-to-end **data lineage and governance**; kept MI and audit artefacts decision-ready for senior risk leaders and aligned Risk, business and technology on ownership and remediation.

### Business analyst and solution architect

2018 to 2019

*Sunlife Insurance via ITC Infotech India*

- Customer 360 digital transformation: requirements, SOPs and end-to-end onsite delivery through release across business and IT.

### Systems engineer to senior technical business analyst

2016 to October 2018

*HSBC and Credit Suisse, India*

Tier-1 institutions: financial risk data across OTC and exchange-traded derivatives. Bridge between risk teams and engineering.

- Wrote **BRDs and FRDs** for CCR, EAD and CVA across UK (PRA), US (Fed/SEC) and Switzerland (FINMA); built logical data models and system design from requirements to IT implementation.
- End-to-end **data lineage, governance and reconciliation**; **SQL-oriented** analysis and source-to-target mapping for capital and reporting data.
- Worked with Regulatory Managers on Basel Pillar 3 disclosure; aligned downstream reporting with **BCBS 239** as the day-to-day link between Risk, Data Management and engineering.

### Systems engineer to business analyst

2013 to 2016

*Standard Bank of South Africa via Nihilent Technologies, India*

- Financial data architecture, risk systems and regulatory reporting pipelines; turned business needs into technical specifications between business units and engineering on data integrity and lineage.

## Certifications

ICAgile ICP-ACC and ICP-ENT · SAFe SSM and PMPO · CSPO · AIGP · IAPP member for GDPR Practices and AI Governance

## Education

MBA, Information Technology, RGIMT, 2019 to 2021 · B.E. IT, Savitribai Phule Pune University, 2009 to 2013  
Design Thinking and Digital Transformation, IBM Berlin, 2021 · AI Regulation and EU AI Act, KU Leuven, Dec 2025 to Jan 2026

## Languages

English (full professional) · Dutch (working proficiency) · French (basic) · German (basic)
