ING Belgium

Re: Product Owner & Senior Risk Data Journey Expert, Credit Infrastructure

Dear ING Hiring Team,

I am applying for the **Product Owner & Senior Risk Data Journey Expert role in Credit Infrastructure**. I understand the role as a genuine split: half Product Owner leading an agile squad on credit risk engine delivery, half risk data journey expert shaping the credit risk data landscape. That is how I have worked for years, not as two separate careers bolted together.

On the Product Owner side, I have six years owning and prioritising **product backlogs**, leading squads through sprint planning and delivery, and working across **Risk, Data Management and IT**. At KBC I owned the Basel IV and AnaCredit calculation engine backlog against NBB and ECB deadlines. At Uplight I was Product Owner for a data product on Google Cloud. At iost ring I lead and coach squads for investment banking clients on credit risk and regulatory change. I am used to being the person who turns business and regulatory priorities into a clear delivery plan and who stays accountable when auditors or senior stakeholders ask hard questions.

On the risk data journey side, my depth is in the same domain your Credit Infrastructure team operates in. At **HSBC and Credit Suisse** I worked on **PD, EAD, LGD parameters, CCR, CVA, RWA and LLP-related** reporting, credit risk engines, data lineage, source-to-target mapping and BCBS 239. I wrote BRDs and FRDs, designed data flows between risk and engineering, and supported Basel Pillar 3 and post-Brexit regulatory initiatives. At Credit Suisse I led the Counterparty Credit Risk data team. At **Standard Bank** I worked on risk systems and regulatory reporting pipelines. At KBC I kept calculation engines aligned with the latest regulatory requirements and supported data platform and cloud programmes alongside the reporting work.

I am a Belgium resident and will return from India shortly. I am **legally authorized to work in Belgium and do not need a work permit**. I work in English and Dutch. I would welcome a conversation about how I can help your team deliver credit risk engine change and evolve the data landscape behind it.

Yours sincerely,

Anjish Bhondwe
