ING Belgium

Re: Squad Master / Product Owner, Current Accounts

Dear ING Hiring Team,

I am applying for the **Squad Master / Product Owner role on Current Accounts**. ING's goal to become the most recommended mobile-led bank in Belgium matches the kind of work I have been doing at KBC and as a product owner: put the customer first, keep banking simple, and deliver change in a regulated environment where risk and commercial value both matter.

At KBC in Brussels I spent four years close to **retail and corporate banking squads**. I worked with product owners and scrum masters on **backlog prioritisation, feature intake, sprint planning and stakeholder communication**. I coached the squad that delivered Kate Coin, a digital bank coin under ECB constraints, and I led **GDPR change for Corporate and Retail Banking**. That taught me how to balance customer experience, employee impact and risk approval in day-to-day delivery.

Before KBC I was Product Owner for Carbon Zero at Uplight, where I owned the **backlog, roadmap and release plan** and ran sprint planning and stand-ups with the team. At Sunlife Insurance I worked on a **Customer 360 digital transformation**, from customer journey requirements through to release. Since November 2024 at iosting I coach product owners and squads on agile ceremonies, backlog quality and stakeholder alignment. I hold an MBA in Information Technology, CSPO and SAFe PMPO.

I am a Belgium resident and will return from India shortly. I am **legally authorized to work in Belgium and do not need a work permit**. I work in English and Dutch. I would welcome a conversation about how I can help the Current Accounts squad drive the next evolution of your account packs.

Yours sincerely,

Anjish Bhondwe
