Re: IT Team Leader (m/f/d) · AV-357351 · Permanent · Sarah Stroobants

Dear Sarah Stroobants and Hiring Team,

I am a professional leader with 14 years in IT and I am applying for the IT Team Leader role in Diegem. The job is people leadership of Software Solution Engineers: direction, coaching, knowledge growth and a team that can deliver digital solutions with craft and ownership. That is the work I have been doing with delivery and engineering people at KBC and in my current Director mandate at iostring.

At KBC in Brussels and Leuven I led people across multi-country squads. I ran mentorship and performance talks, kept information moving between the team, stakeholders and leadership, and cleared conflicts and blockers so software work could finish on time with quality. I also sat in leadership conversations on how the department needed to evolve. At iostring, as Director of Agile Delivery & Transformation, I own people leadership, skills plans and the ways of working that keep a team sustainable. My first job was student Analyst work in logistics BPO at Archway Consulting, so the logistics operating world is familiar ground.

I hold a Belgian residence A card. With a permit transfer I can take a permanent contract for Diegem. I work in English with working Dutch and basic French, and I am ready for the hybrid rhythm and travel under 25%. I would welcome a conversation about how I would enable your Software Solution Engineers team.

Yours sincerely,

Anjish Bhondwe
