

Anjish Bhondwe

Delivery Governance & Process Manager · Standards & Methods · Product Operating Model

anjish.bhondwe@gmail.com · +32 489 858 959 · linkedin.com/in/anjish · Portfolio: anjishbhondwe.com

Professional Summary

Delivery Governance and Process Manager with hands-on Delivery Enablement, Transformation Office / PMO and operational excellence experience in large-scale technology delivery. I turn strategic direction, delivery experience and stakeholder input into practical standards, methods, governance frameworks and reusable delivery assets. I design and evolve the delivery operating model, formalise ways of working, set governance mechanisms and build measurable feedback loops on delivery performance. This is implementation work, not ceremony coaching: playbooks, templates, workflows, decision frameworks, adoption checks and continuous improvement of the delivery system. Recent work: at iost ring I built the delivery enablement practice and Agile Center of Excellence, including common ways of working, governance foundations and delivery metrics for financial-services clients; at KBC I ran delivery governance for a 5-country Scaled Agile train / tribe with SteerCo measurement and dependency closure; as Interim SAFe Delivery Lead / RTE at Colruyt I coordinated cross-team delivery mechanisms at ART level. Strong professional English; working Dutch; basic French. Based for Brussels hybrid (2 days on-site).

Core Skills

- Delivery Enablement / Standards & Methods: standards, procedures, playbooks, templates, workflows and decision frameworks
- Product Operating Model design and common delivery ways of working across product, engineering and business
- Delivery governance frameworks: escalation paths, SteerCo packs, dependency closure and decision follow-up
- Scaled Agile and cross-team delivery mechanisms: SAFe trains / ARTs, RTE practice, PI planning and tribe governance
- Delivery performance and measurement frameworks: KPIs, adoption metrics, operational outcomes and feedback loops
- SLA / OLA-style service and delivery performance monitoring with clear feedback to owners
- Gap, overlap and inconsistency analysis across processes and ways of working; improvement from concept to adoption
- Workforce, sourcing and external partner / service-request decisions through clear process and governance
- Reusable operational assets teams can understand and adopt; balance standardisation with delivery reality
- Stakeholder management across Product, Delivery, Architecture, Risk, Compliance and leadership
- Tooling: Jira, Confluence, Miro, Power BI / delivery dashboards, Azure DevOps-class platforms

Experience

Director of Agile Delivery & Transformation · Delivery Enablement

November 2024 to present

iost ring Technology and Consulting · Belgium and India

Standards & Methods · Product Operating Model · Agile CoE · financial-services clients · India operation lead since September 2025

- Built the delivery enablement practice and Agile Center of Excellence: practical delivery standards, methods and governance frameworks for product, engineering and business operations.
- Developed and maintain a coherent Product Operating Model and common delivery ways of working; documented playbooks, templates, workflows and decision frameworks teams can reuse.
- Established delivery performance and measurement frameworks (cycle time, throughput, dependency health, SteerCo packs) and feedback loops to improve adoption and operational outcomes.
- Coordinate dependencies between the operating model, Scaled Agile practice and delivery metrics; identify gaps and overlaps in processes and close actions with stakeholders.
- Support workforce, sourcing and outsourcing-partner decisions through clear intake, capacity and governance paths; assess whether standards are adopted and whether they deliver intended results.
- Hands-on between strategy and execution: turn ambiguity into clear deliverables, drive improvement from concept through implementation and adoption, and keep topics closed.
- Since September 2025 I have combined primary family care with this Director role.

Interim SAFe Delivery Lead / RTE

October 2024 to June 2025

Colruyt Group · XTRA (via iost ring), Belgium

- Supported Scaled Agile and cross-team delivery mechanisms at ART level: PI planning, dependency coordination and leadership reporting on progress and risk.
- Translated strategic priorities into practical delivery process: prioritised backlog, definition of done and measurable commitments across squads.

Experience (continued)

Delivery Lead · Senior Scrum Master & People Manager / Team Lead

September 2021 to October 2024

KBC Bank and Verzekering · Brussels and Leuven, Belgium

5-country Scaled Agile delivery train / tribe · Belgium, Hungary, Czech Republic, Bulgaria and India · 100+ onshore-offshore members

- Ran delivery governance for a multi-country train / tribe: intake and capacity, dependency and risk management, escalation and SteerCo reporting to leadership.
- Formalised ways of working across squads and trains; improved common delivery standards under regulatory constraints (Basel IV, AnaCredit, GDPR) while balancing governance with team reality.
- Established and used delivery KPIs and feedback loops for conversion-relevant risks, capacity and outcomes; followed actions and decisions to closure with Product, Risk, data and engineering stakeholders.
- Coordinated Product Operating Model elements with Scaled Agile practice: Product Owners, Scrum Masters, architects and programme managers on cross-team delivery mechanisms.
- Drove improvement initiatives from concept to adoption (including Kate Coin onboarding in the KBC App under ECB constraints) with reusable delivery artefacts and clear ownership.
- Supported sourcing and offshore service arrangements through transfer-of-activities and lifecycle governance so local squads stayed on change.

Product Owner

October 2020 to September 2021

UST Global for Uplight · India, USA and Canada

- Owned roadmap and release process for a multi-country digital product; documented backlog and release workflows used by a three-country delivery squad.

Lead Agile Business Analyst · Investment Banking Credit Risk

October 2019 to October 2020

Credit Suisse · India

Wholesale / investment banking · Bonds and credit risk under CRO / CFO vertical.

- Improved delivery process for a regulated credit-risk and bonds squad: requirements into backlog, decision-ready MI packs and clear Risk / Finance / technology handoffs.
- Used metrics and dashboards to surface process gaps and delivery risk through post-Brexit change.

Business Analyst / Product Owner

June 2018 to September 2019

Sun Life Insurance, Geelong, Australia

- Documented end-to-end process journeys and cut friction in regulated workflows; produced practical operational artefacts stakeholders could adopt.

Senior Technical Business Analyst to Systems Engineer · Investment Banking

2013 to 2018

HSBC, Credit Suisse and Standard Bank (via Nihilent), India

- Built delivery craft in high-governance investment banking: standards for requirements, data quality (BCBS 239), capital and regulatory reporting across UK, US, Swiss and South African contexts.
- Bridged Risk, CRO-aligned stakeholders, business and engineering with clear procedures and reusable documentation.

Certifications

SAFe SSM · SAFe PMPO · CSPO · ICAgile ICP-ACC · ICP-ENT · AISM (AI Scrum Master) · AIGP (AI Governance Professional) · IAPP member

Education

- AI Regulation and the EU AI Act, KU Leuven, Dec 2025 to Jan 2026
- Design Thinking and Digital Transformation, IBMI Berlin, 2021
- MBA, Information Technology, RGIMT, 2019 to 2021
- B.E. Information Technology, Savitribai Phule Pune University, 2009 to 2013

Languages

English (full professional) · Dutch (working proficiency) · French (basic)
