| Jun'24 – Present                     | <b>Career Break</b> · Belgium & India <ul style="list-style-type: none"><li>Planned career break for parenting newborns, spanning relocation from Belgium to India. Alongside family responsibilities, maintained professional currency through independent study in <b>circular construction and reverse logistics</b> and <b>GIS / geospatial and machine-learning</b> (Google Earth Engine), preparing for design-science doctoral research.</li></ul>                                                                                                    |        |
| Aug'23 – Jun'24                      | <b>Civil &amp; Environmental Project Consultant, iosttring, Belgium</b> <ul style="list-style-type: none"><li>Consulted the <b>IT engineering team</b> on how civil construction projects are planned and managed within an <b>Agile framework</b>, aligning ways of working across civil and software teams.</li><li>Designed <b>construction workflows for waste management and circular-economy processes</b>, using project data to support material reuse and waste-reduction decisions.</li></ul>                                                      |        |
| Nov'22 – Aug'23                      | <b>Project Engineer, Hive CPQ, Ghent, Belgium</b> <ul style="list-style-type: none"><li>Managed large datasets and <b>gathered requirements</b> from manufacturers (Pellenc, Mecatherm, Soproda) and customers, integrating manufacturing, construction and supply-chain data into a data mart.</li><li>Built configurators that <b>turned complex rules into intuitive digital tools</b>, translating stakeholder needs into practical solutions for technical and non-technical users.</li></ul>                                                           |        |
| Jun'22 – Nov'22                      | <b>Project Engineer, Aug.e, Brussels, Belgium</b> <ul style="list-style-type: none"><li>Contributed to energy-transition and smart-building projects using a <b>digital-twin stack</b> (Microsoft Azure, Navisworks Manage, Neanex, Revit), organising and integrating data from physical assets into digital decision-support.</li><li>Worked with IoT, AI and metadata layers linking building and energy data to decisions, close to the data-integration mindset behind <b>BIM and logistics parameters</b>; tracked delivery in Azure DevOps.</li></ul> |        |
| Aug'21 – Sep'21                      | <b>Trainee (Master's Thesis), HTW Dresden, Germany</b> <ul style="list-style-type: none"><li>Researched <b>Agile project planning in an IT-sustainability setting</b> aligned to UN Global Compact / SDG themes; gathered qualitative and quantitative requirements on environmental impacts (climate, waste, water, energy) and built product backlogs in Jira.</li></ul>                                                                                                                                                                                   |        |
| Oct'19                               | <b>Trainee, Fraunhofer Institute, Dresden, Germany</b> <ul style="list-style-type: none"><li>Planned a <b>green business model</b> for biogas-to-biowax demand and adopted EU sustainability policy, assessing green-business financials and transformation tools.</li></ul>                                                                                                                                                                                                                                                                                 |        |

## Technical Skills

|                            |                                                                                  |
|----------------------------|----------------------------------------------------------------------------------|
| <b>Digital &amp; BIM</b>   | Revit, Navisworks Manage, Neanex, AutoCAD; digital twins                         |
| <b>Geospatial / GIS</b>    | Google Earth Engine, QGIS, ArcGIS, ERDAS Imagine                                 |
| <b>Data &amp; analysis</b> | Data modelling & integration, Tableau, MongoDB, Postman, Lucidchart, Excel       |
| <b>Project &amp; Agile</b> | Jira, Confluence, Asana, Miro, Azure DevOps, Primavera P6; Scrum, Kanban (PSK I) |
| <b>Research methods</b>    | Design-science research, qualitative case studies, requirements engineering      |

## Certifications

- Professional Scrum with Kanban (PSK I) · Scrum.org
- Google Earth Engine for Machine Learning & Change Detection
- Construction Management: Planning and Scheduling
- Primavera P6
- Excel Essential Training (Office 365 / Microsoft 365)

## Publications

“Design and Analysis of Building by AKSES and Manual Method.”

## Areas of Interest

- Circular construction: reuse, refurbishment and end-of-life material recovery
- Reverse logistics and construction supply chains
- Digital decision-support: BIM, GIS, digital twins and material passports
- Design-science research for sustainability and CO<sub>2</sub> reduction
