Current Location: Pune, India

Languages: English (C1); German (B1); Dutch (A1/A2)

## Education

|           |                                                                                                                                 |        |
|-----------|---------------------------------------------------------------------------------------------------------------------------------|--------|
| 2018–2022 | <b>HTW Dresden (Hochschule für Technik und Wirtschaft), Germany</b><br>Master of Engineering (M.Eng), Environmental Engineering | 2.8    |
| 2014–2017 | <b>Savitribai Phule Pune University, India</b><br>Bachelor of Engineering (B.E), Civil Engineering                              | 65.26% |
| 2010–2014 | <b>Maharashtra State Board of Technical Education (MSBTE), India</b><br>Diploma, Civil Engineering                              | 68.11% |
| 2010      | <b>Maharashtra State Board (MSBSHSE), India</b><br>10th Standard (Secondary School Certificate)                                 | 82.55% |

## Materials & laboratory testing

- **India (Diploma & B.E. Civil):** concrete, aggregates/sand, steel, soil and water labs, including slump and cube compressive strength (IS 1199, IS 516), aggregate grading (IS 2386), steel tensile testing (IS 1608 / IS 1786), and Proctor / Atterberg limits (IS 2720).
- **Germany (HTW Dresden):** Construction Materials; Geotechnical Project; Water, Air and Soil Analysis laboratory practicals; Soil Management; Water and Wastewater Treatment; Solid Waste Management and Recycling.

## Professional Experience

|                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Jun'24 – Present | <b>Career Break · Belgium &amp; India</b> <ul style="list-style-type: none"><li>• Planned career break for parenting newborns, with relocation from Belgium to India. Kept learning on <b>construction materials</b>, material testing concepts, circular construction and soil/water topics, preparing for doctoral research in materials and structures.</li></ul>                                                                                   |
| Aug'23 – Jun'24  | <b>Civil &amp; Environmental Project Consultant, iosttring, Belgium</b> <ul style="list-style-type: none"><li>• Worked with a construction partner on bringing <b>circular practices</b> into day-to-day project delivery, including material reuse and waste-management thinking on site.</li><li>• Supported civil project planning understanding and designed workflows for construction waste management and circular-economy processes.</li></ul> |
| Nov'22 – Aug'23  | <b>Project Engineer, Hive CPQ, Ghent, Belgium</b> <ul style="list-style-type: none"><li>• Managed large product and technical datasets from manufacturers such as Pellenc, Mecatherm and Soproda.</li><li>• Translated complex manufacturer and client requirements into clear, structured product information for project use.</li><li>• Worked with stakeholders to keep technical product data accurate and usable across projects.</li></ul>       |
| Jun'22 – Nov'22  | <b>Project Engineer, Aug.e, Brussels, Belgium</b> <ul style="list-style-type: none"><li>• Worked on building-performance projects linking building models with real operational data.</li><li>• Monitored electricity-meter data to assess energy performance and support more efficient building operations.</li><li>• Supported sustainability-focused review of building information and energy use.</li></ul>                                      |

## Master's Thesis

|                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|-----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Aug'21 – Sep'21 | <b>Agile Project Management in the Construction Industry</b><br><i>HTW Dresden, Germany · Master of Engineering (Environmental Engineering) · grade 2.5</i> <ul style="list-style-type: none"><li>• Studied how construction teams can improve collaboration, risk handling and resource efficiency in project delivery.</li><li>• Linked construction organisation practice to careful use of materials and environmental outcomes on projects.</li></ul> |
|-----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## Technical Skills

|                          |                                                                                                                                           |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Materials / civil</b> | Concrete, steel, soil and aggregate laboratory testing (IS practice); construction materials and geotechnical project work (HTW); AutoCAD |
| <b>Environmental</b>     | Water, air and soil analysis; wastewater treatment concepts; solid waste management and recycling                                         |
| <b>Geospatial</b>        | QGIS, ArcGIS, ERDAS Imagine; remote sensing basics                                                                                        |
| <b>Reporting</b>         | Excel; research reporting; construction planning basics (Primavera P6)                                                                    |

## Certifications

- Construction Management: Planning and Scheduling
- Primavera P6
- Excel Essential Training (Office 365 / Microsoft 365)

## Publications

"Design and Analysis of Building by AKSES and Manual Method."

## Areas of Interest

- Characterisation and mechanical behaviour of construction materials
- Mechanics-driven design of high-performance and sustainable materials and structures
- Geotechnical and soil-related testing; construction waste and material reuse
- Life-cycle and environmental aspects of civil materials and infrastructure
