Keystone Solutions

Re: Agile Coach Consultant (client mission, Brussels)

Dear Keystone Solutions Team,

I am applying for the Agile Coach Consultant role for your client in Brussels. I am an enterprise agile coach with 13 years in complex, regulated organizations.

I coach squads, chapters and senior leaders (scrum masters, product owners, chapter leads) on the agile operating model and its values, facilitate squad and tribe ceremonies, and lead change management and training that embeds new ways of working. I founded and run an Agile Center of Excellence, and I coach without relying on formal authority. My agile work has mostly been in banking and business operations. I have not coached a Marketing and Communication department specifically, and getting up to speed on a new context is something I take on directly.

I am available for a new assignment from October and I do not need a work permit for Belgium. I am comfortable with the 50% on-site, 50% home setup in Brussels. I work in English and have working proficiency in Dutch.

I would welcome a conversation about this mission.

Yours sincerely,

Anjish Bhondwe
