

Anjish Bhondwe

Enterprise Risk Planning · Risk Technology, Data Strategy & Delivery (VP level)

freelanceanjish@gmail.com · +32 489 858 959 · linkedin.com/in/anjish · anjishbhondwe.com

Open to relocating to Amsterdam. I do not need a work permit for Belgium or the EU.

Professional Summary

Risk technology and data planning profile with **13 years in regulated banking**. I shape how Risk, IT and Data Management work together: **roadmaps and operating models**, **Agile project delivery**, and requirements that become usable risk data and tools. At KBC I sat between Risk, Data and IT on multi-country regulatory programmes, ran **SteerCo packs**, and delivered under **Basel IV**, **AnaCredit**, **GDPR** and **BCBS 239**. At Credit Suisse and HSBC I owned **IT business requirements** for counterparty credit risk and capital data, and held the Second Line to engineering link on lineage, quality and fitness for purpose. I bring **data stewardship habits**, Collibra-led governance delivery, and hands-on use of **SQL**, **Python**, **Power BI**, **Azure**, **GitHub** and **AI/GenAI** (AIGP) with attention to control.

Core Skills

Project management / Agile: Scrum · SAFe · PI planning · intake and capacity · dependency and risk control · hybrid delivery under regulatory deadlines

Strategy, roadmap, TOM: transformation roadmaps · target ways of working · CoE / enablement operating models · investment and priority framing for leadership

Requirements to technology: BRDs / FRDs · IT business requirements · solution design · data models · source-to-target mapping
Senior / governance communication: SteerCo packs · recommendations for senior management · audit-ready MI · regulatory programme reporting

Cross-functional influence: Risk · IT · Data Management · product and engineering · competing priorities across countries and partners

Risk, data, regulation: BCBS 239 · Basel Pillar 3 / Basel IV · AnaCredit · GDPR · CCR / EAD / CVA / RWA · data quality and stewardship

Tools (hands-on): SQL · Python · Power BI · Azure · GitHub · AI / GenAI · Collibra · data lineage / reconciliation · delivery metrics tooling

Stakeholder management: influence without owning every team · escalate cleanly · keep Second Line needs visible to IT and Data

Experience

Director for Agile Delivery Excellence

November 2024 to present

iostring Technology and Consulting, India

Delivery and operating-model design for regulated financial services clients · India operation lead since Sep 2025

- Owned the **strategy artefacts** leadership needed: transformation **roadmap**, target ways of working, and an **operating model** for intake, capacity, ceremonies, metrics and escalation across product, engineering and business operations.
- Built the Agile CoE from scratch with practical **Scrum and SAFe** project standards, not slides only: governance foundations and coach-the-coach paths that stuck in day-to-day delivery.
- Run end-to-end **project intake and capacity**: clarify demand, prioritise, route work, and balance competing priorities when several stakeholders want the same scarce capacity.
- Prepare leadership reviews with clear recommendations; act as escalation point across architecture, testing and programme management.
- Use **AI / GenAI** in delivery work with governance in mind (AIGP), and work day to day with **GitHub** and modern delivery tooling alongside product and engineering.
- Since Sep 2025, manage the India operation: people, performance, hiring, skills and outsourcing partners.

Delivery Lead (Risk / Data / IT interface)

September 2021 to October 2024

KBC Bank and Verzekering, Brussels and Leuven

Liquidity Reporting unit across Belgium, Hungary, Czech Republic and Bulgaria. Day-to-day work sat between Risk, Data Management and IT on regulatory reporting programmes.

- Led **Agile and hybrid project delivery** for squads and trains across four EU countries: PI planning, dependency management, and portfolio alignment to regulatory deadlines.
- Owned **intake, capacity and prioritisation** across departments; kept competing Risk, Data and IT demands from breaking liquidity reporting windows under **Basel IV and AnaCredit**.
- Prepared and presented the **SteerCo / senior management picture** in **Power BI**-backed packs: KPIs, risks, mitigations and recommendations for tribe leadership and governance forums.

Experience (continued)

Delivery Lead (Risk / Data / IT interface)

September 2021 to October 2024

KBC Bank and Verzekering, Brussels and Leuven (continued)

- Drove **data governance and catalogue delivery with Collibra**: stewardship, metadata and delivery teams working as one so risk reporting data was clearer and more reliable for decisions; partnered with engineering on **Azure** data landscapes used for reporting.
- Delivered **GDPR implementation** for Corporate and Retail Banking alongside data-heavy regulatory reporting programmes.
- Coached the squad that delivered Kate Coin under ECB constraints: control-heavy delivery where technology, risk and governance had to stay aligned.
- Managed performance, hiring and onshore-offshore partners in a federated setup.

Product owner and manager, Carbon Zero

October 2020 to September 2021

UST Global for Uplight, India (US, Canada and India)

- Owned product **roadmap, backlog and release plan** on Google Cloud; prepared priority recommendations for the product director and VP of engineering.

Lead Business Analyst (risk data / Second Line interface)

October 2019 to October 2020

Credit Suisse, India

Counterparty credit risk data, post-trade data quality and settlement lifecycle; post-Brexit regulatory change.

- Gathered, analysed and documented **IT business requirements** for risk data quality and reconciliation; translated Second Line needs into technology delivery with engineering.
- Owned end-to-end **data lineage and governance** habits: decision-ready MI for senior risk leaders, plus alignment on ownership and remediation when data issues blocked reporting.

Business analyst and solution architect

2018 to 2019

Sunlife Insurance via ITC Infotech India

- Customer 360 transformation: requirements, SOPs and onsite delivery through release across business and IT.

Senior technical business analyst (risk technology requirements)

2016 to October 2018

HSBC and Credit Suisse, India

Financial risk data for OTC and exchange-traded derivatives. Day-to-day bridge between Risk and engineering.

- Wrote **BRDs and FRDs** for CCR, EAD and CVA across UK (PRA), US (Fed/SEC) and Switzerland (FINMA); took requirements through logical data models into IT implementation.
- Ran **data lineage, governance and reconciliation** with hands-on **SQL and Python** analysis and source-to-target mapping for capital and reporting data.
- Supported Basel Pillar 3 disclosure work with Regulatory Managers; aligned downstream reporting with **BCBS 239** so Risk, Data Management and engineering shared one view of data fitness.

Systems engineer to business analyst

2013 to 2016

Standard Bank of South Africa via Nihilent Technologies, India

- Risk systems and regulatory reporting pipelines: turned business needs into technical specifications on data integrity and lineage.

Certifications

ICAgile ICP-ACC and ICP-ENT · SAFe SSM and PMPO · CSPO · AIGP · IAPP member (GDPR Practices and AI Governance)

Education

MBA, Information Technology, RGIMT, 2019 to 2021 · B.E. IT, Savitribai Phule Pune University, 2009 to 2013

Design Thinking and Digital Transformation, IBM Berlin, 2021 · AI Regulation and EU AI Act, KU Leuven, Dec 2025 to Jan 2026

Languages

English (full professional) · Dutch (working proficiency) · French (basic) · German (basic)
