Professional Summary

I establish and improve how engineering teams operate: agile delivery that fits an AI-first pace, stays disciplined under speed, and scales across distributed and India-based contributors. I own sprint and flow end to end: cadence, backlog readiness with the roadmap lead, committed sprint goals and burn-down health, and impediments driven to resolution. Accountable for team outcomes, not task activity: predictability, cycle time, velocity and retro action closure. I design ways of working for AI-accelerated delivery with built-in checkpoints for architecture, review depth and "are we building the right thing?", and I coach Azure DevOps hygiene without ceremony for its own sake. At iostoring I am experimenting with Agile × AI × DevOps and agentic development (GitHub Copilot, Claude Code). Before that I led multi-country Agile delivery at KBC across EMEA, including onshore-offshore India partners.

Core Skills

- Sprint and flow: ceremonies, sprint-goal commitment, burn-down health, scope trade-offs
- Backlog readiness with roadmap / customer-engagement leads; impediment log and escalation
- Team outcome metrics: velocity, predictability, cycle time, retro action closure
- AI-accelerated way of working: speed with architecture, review depth and quality checkpoints
- Scaling distributed and multi-timezone delivery, including India-based engineering contributors
- Agile coaching and operational 1:1s on blockers, capacity and day-to-day engagement
- Azure DevOps hygiene: Features, User Stories, sprints, queries and leadership status packs
- AI / ML PoC and feasibility coordination vs exploration and productization

Technical Stack

Scrum · Kanban · SAFe / scaled patterns · Azure DevOps · Confluence · SharePoint · Jira · Git / GitHub · GitHub Copilot · Claude Code · CI/CD · Azure · AWS · Power BI · Python · leadership status reporting

Experience

Director of Agile Delivery & Transformation

November 2024 to present

iostoring Technology and Consulting, India

Innovation / startup setting · Agile × AI × DevOps experimentation · India engineering partners

- Introduce and evolve a pragmatic way of working for small multidisciplinary delivery, including intake, capacity and priority calls when work competes.
- Experiment with Agile AI DevOps and agentic software development (GitHub Copilot, Claude Code): keep velocity high without shipping fast and shallow.
- Coordinate AI feasibility and PoC-style initiatives against a real operating cadence, separating exploration from productization.
- Coach contributors on agile practice and tooling hygiene; run operational 1:1s on blockers, capacity and engagement.
- Scale collaboration with India-based individual contributors and partners across timezones.
- Since September 2025, after the birth of my second child, I have given primary care to my family while continuing as Director of Agile Delivery & Transformation.

Delivery Lead

September 2021 to October 2024

KBC Bank and Verzekering, Brussels and Leuven

EMEA delivery across Belgium, Hungary, Czech Republic and Bulgaria, with onshore-offshore India partners. Day to day with Product, Scrum Masters, engineering and business.

- Ran agile cadence for multidisciplinary squads and trains: sprint goals, backlog readiness with Product, impediments escalated within days not weeks.
- Owned team-level outcomes: improved predictability and flow through process change, capacity discipline and clear delivery health reporting.
- Adapted ceremonies and rituals for distributed, multi-timezone delivery including India-based contributors.
- Coached the delivery vertical on pragmatic agile practice; partnered with roadmap and product leads on refinement and scope trade-offs.

Experience (continued)

Delivery Lead

September 2021 to October 2024

KBC Bank and Verzekering, Brussels and Leuven (continued)

- Prepared leadership-facing status packs on risks, capacity and delivery health for SteerCo and senior management.
- Kept engineering and quality expectations visible so speed did not erase review depth and "are we building the right thing?" checks.
- Coordinated across 5 to 10+ person multidisciplinary groups and wider trains when dependencies blocked flow.

Product Owner and Manager, Carbon Zero

October 2020 to September 2021

UST Global for Uplight, India (US, Canada and India)

- Owned roadmap, backlog and release plan with the product director and VP of engineering: refinement, priority and definition of done.
- Kept a distributed Product and engineering team aligned on sprint and release outcomes across timezones.

Lead Business Analyst, Risk Data

October 2019 to October 2020

Credit Suisse, India

- Turned requirements into delivery-ready backlog with engineering in a regulated setting; kept documentation and status clear for stakeholders.

Business Analyst / Product Owner

June 2018 to September 2019

HealthRFID, Geelong, Australia

Regulated health-technology products. Multidisciplinary delivery with clinical operations, Product and engineering.

- Shaped backlog, acceptance criteria and delivery plans for engineering; partnered on Agile cadence and release readiness.

Senior Technical Business Analyst, Risk Technology

2016 to October 2018

HSBC and Credit Suisse, India

- Bridge between business, functional and technical teams on delivery of risk technology and reporting work.

Systems Engineer to Business Analyst

2013 to 2016

Standard Bank of South Africa via Nihilent Technologies, India

- Built the technical base behind later Agile delivery and BA / PO leadership.

Certifications

ICAgile ICP-ACC · ICAgile ICP-ENT · SAFe SSM · SAFe PMPO · CSPO · IAPP member · AIGP (AI Governance Professional) in progress

Education

- MBA, Information Technology, RGIMT, 2019 to 2021
- B.E. Information Technology, Savitribai Phule Pune University, 2009 to 2013
- Design Thinking and Digital Transformation, IBMI Berlin, 2021
- AI Regulation and the EU AI Act, KU Leuven, Dec 2025 to Jan 2026

Languages

English (full professional) · Dutch (working proficiency) · French (basic) · German (basic)
