

POOJA AWASARE

15 Aug 1994

Email: poojaawasare@outlook.com

Phone (BE): +32 489 858 959 · Phone (IN): +91 90968 90003

LinkedIn: [linkedin.com/in/poojaawasare](https://www.linkedin.com/in/poojaawasare)

Location: Pune, India

Languages: English (C1); German (B1); Dutch (A1/A2)

Education

2018–2022	HTW Dresden (Hochschule für Technik und Wirtschaft), Germany Master of Engineering (M.Eng), Environmental Engineering	2.8
2014–2017	Savitribai Phule Pune University, India Bachelor of Engineering (B.E), Civil Engineering	65.26%
2010–2014	Maharashtra State Board of Technical Education (MSBTE), India Diploma, Civil Engineering	68.11%
2010	Maharashtra State Board (MSBSHSE), India 10th Standard (Secondary School Certificate)	82.55%

Materials & laboratory testing

- **India (Diploma & B.E. Civil):** concrete, aggregates/sand, steel, soil and water labs, including slump and cube compressive strength (IS 1199, IS 516), aggregate grading (IS 2386), steel tensile testing (IS 1608 / IS 1786), and Proctor / Atterberg limits (IS 2720).
- **Germany (HTW Dresden):** Construction Materials; Geotechnical Project; Water, Air and Soil Analysis laboratory practicals; Soil Management; Water and Wastewater Treatment; Solid Waste Management and Recycling.

Professional Experience

Jun'24 – Present	Career Break · Belgium & India • Planned career break for parenting newborns, with relocation from Belgium to India. Kept learning on construction materials, material testing concepts, circular construction and soil/water topics, preparing for doctoral research in materials and structures.
Aug'23 – Jun'24	Civil & Environmental Project Consultant, iosttring, Belgium • Worked with a construction partner on bringing circular practices into day-to-day project delivery, including material reuse and waste-management thinking on site. • Supported civil project planning understanding and designed workflows for construction waste management and circular-economy processes.
Nov'22 – Aug'23	Project Engineer, Hive CPQ, Ghent, Belgium • Managed large product and technical datasets from manufacturers such as Pellenc, Mecatherm and Soproda. • Translated complex manufacturer and client requirements into clear, structured product information for project use. • Worked with stakeholders to keep technical product data accurate and usable across projects.
Jun'22 – Nov'22	Project Engineer, Aug.e, Brussels, Belgium • Worked on building-performance projects linking building models with real operational data. • Monitored electricity-meter data to assess energy performance and support more efficient building operations. • Supported sustainability-focused review of building information and energy use.

Master's Thesis

Aug'21 – Sep'21	Agile Project Management in the Construction Industry <i>HTW Dresden, Germany · Master of Engineering (Environmental Engineering) · grade 2.5</i> • Studied how construction teams can improve collaboration, risk handling and resource efficiency in project delivery. • Linked construction organisation practice to careful use of materials and environmental outcomes on projects.
-----------------	--

Training

Oct'19

Trainee, Fraunhofer Institute, Dresden, Germany

- Planned a green business model for biogas-to-biowax demand; assessed EU sustainability policy, financials and transformation tools.

Technical Skills

Materials / civil	Concrete, steel, soil and aggregate laboratory testing (IS practice); construction materials and geotechnical project work (HTW); AutoCAD
Environmental	Water, air and soil analysis; wastewater treatment concepts; solid waste management and recycling
Geospatial	QGIS, ArcGIS, ERDAS Imagine; remote sensing basics
Reporting	Excel; research reporting; construction planning basics (Primavera P6)

Certifications

- Construction Management: Planning and Scheduling
- Primavera P6
- Excel Essential Training (Office 365 / Microsoft 365)

Publications

“Design and Analysis of Building by AKSES and Manual Method.”

Areas of Interest

- Characterisation and mechanical behaviour of construction materials
- Mechanics-driven design of high-performance and sustainable materials and structures
- Geotechnical and soil-related testing; construction waste and material reuse
- Life-cycle and environmental aspects of civil materials and infrastructure
