

Pooja Awasare

CIVIL & ENVIRONMENTAL PROJECT CONSULTANT · DIGITAL CONSTRUCTION · SUSTAINABILITY

Email: poojaawasare@outlook.com LinkedIn: linkedin.com/in/poojaawasare

Location: Zaventem / Brussels, Belgium

PROFESSIONAL SUMMARY

Civil & Environmental Project Consultant and **Civil-IT project lead** with a hands-on background in **circular construction, digital building tools, and sustainability-focused delivery**. I work at the intersection of environment, technology and construction practice: leading and advising on projects where construction meets digital methods (**BIM workflows, digital twins, Scrum/Kanban delivery**) and making planning and coordination usable for construction stakeholders, not only for IT teams. Certified Professional Scrum with Kanban (PSK I), motivated by **low-carbon, reuse-driven construction** and by building practical tools that make material, logistics and end-of-life decisions clearer.

CORE SKILLS

Digital construction: BIM, digital twins (Revit, Navisworks, Neanex)

Agile ways of working: Scrum, Kanban (PSK I), backlogs & roadmaps

Planning & scheduling: Primavera P6, construction planning, AutoCAD

Circular construction: reuse & reverse logistics, green business models

Data & analysis: Tableau, MongoDB, Postman, Lucidchart

Cloud & delivery: Microsoft Azure, Azure DevOps, IoT/AI data integration

Requirements & solutions: elicitation, stakeholder mgmt, CPQ workflows

Sustainability: EU sustainability policy, UN SDGs / Global Compact

Environmental analysis: climate, waste, water & energy impact

Collaboration: Jira, Confluence, Asana, Miro, SharePoint

PROFESSIONAL EXPERIENCE

Civil & Environmental Project Consultant — iostRING

Aug 2023 – Jun 2024

Belgium

- Led **end-to-end delivery of civil projects** with a focus on time, cost and value, blending project leadership with operational and technical Civil-IT from planning to delivery.
- Defined problem statements, use cases and solution architecture; gathered, linked and analysed project data.
- Used project data to guide **material and reuse choices that reduce waste and impact**, embedding circularity into delivery rather than treating it as a side track.

Project Engineer — Hive CPQ

Nov 2022 – Aug 2023

Ghent Metropolitan Area, Belgium

- Partnered with manufacturers (**Pellenc, Mecatherm, Soproda**) to clarify business goals, constraints and decision needs, then translated them into product and process solutions.
- Integrated manufacturing, construction and supply-chain data into a data mart.
- Turned complex technical options into **clear presentations for technical and non-technical stakeholders**; supported implementation through configuration, testing and problem-solving.

Brussels Metropolitan Area, Belgium

- Contributed to **energy-transition and smart-building projects** using a plug-and-play digital-twin stack: Microsoft Azure, Navisworks Manage, Neanex and Revit.
- Documented client requirements and coordinated with product owners; tracked scope and delivery with **Azure DevOps** across multiple teams.
- Worked with IoT, AI and metadata layers linking building/energy data to operational decisions; supported smart-battery and Local Energy Community setups.

Trainee (Master's Thesis) — HTW Dresden (Hochschule für Technik und Wirtschaft)**Aug 2021 – Sep 2021***Dresden, Germany*

- Applied **agile project planning and management in an IT-sustainability setting**, aligning scope with UN Global Compact / SDG themes.
- Gathered qualitative and quantitative requirements on environmental impacts (climate, waste, clean water, energy); built project plans, use cases and product backlogs in Jira with Scrum/Kanban.
- Mapped dependencies, blockers and risks in Asana for a multi-partner (university, contractor, research) programme.

Trainee — Fraunhofer Institute**Oct 2019***Dresden, Germany*

- Planned a **green business model** to meet high biogas demand for biowax production; assessed the key factors of the business environment and relevant tools.
- Read and assessed financial reports of green businesses and adopted EU sustainability policy for transforming a traditional enterprise into a green one.

CERTIFICATIONS

Professional Scrum with Kanban (PSK I) · Scrum.org
Construction Management: Planning & Scheduling Primavera P6
Google Earth Engine for ML & Change Detection
Excel Essential Training · Microsoft 365

EDUCATION

M.Eng, Environmental Engineering · HTW Dresden · 2018–2022
Thesis: Agile Project Management for Sustainable Construction Innovation
B.E. Civil Engineering · SPP University, Pune · 2014–2017
Diploma, Civil Engineering · MSBTE, India · 2010–2014

PUBLICATIONS & HIGHLIGHTS

Publication: "Design and Analysis of Building by AKSES and Manual Method." • **Focus:** circular and low-carbon construction, making reuse and reverse-logistics decisions clearer when availability, quality, timing, transport, cost and CO₂ are uncertain. • **Prior:** research experience at HTW Dresden and the Fraunhofer Institute, Germany.
