

Anjish Bhondwe

Delivery enablement and agile delivery lead

freelanceanjish@gmail.com +32 489 858 959 [linkedin.com/in/anjish](https://www.linkedin.com/in/anjish) [anjishbhondwe.com](https://www.anjishbhondwe.com)

Available in Brussels from October. I do not need a work permit for Belgium.

I lead delivery enablement in large, regulated financial organisations. I set up the ways of working, the governance and the reporting, keep demand and capacity in balance, and step in when something is blocked. Over 13 years, mostly in banking, I have managed multi-location IT teams and outsourcing partners, coordinated architects and programme managers, and kept delivery predictable under real regulatory pressure.

Experience

Founding director and delivery enablement lead

2023 to present

iostring Technology and Consulting, India (running the India operation since September 2025)

I set up the delivery enablement and coaching practice, and I run the India side of the business.

- Built a delivery enablement practice and an Agile Center of Excellence from nothing: standard ways of working, governance foundations and coach-the-coach paths that teams actually use.
- Run intake and capacity: capture new demand, clarify it, route it to the right teams, and keep priorities and capacity in balance.
- Track delivery health (cycle time, flow, dependencies) and report it with clear mitigations.
- Manage the India operation, including people, hiring and relationships with outsourcing partners.

Delivery enablement lead and enterprise agile coach

September 2021 to October 2024

KBC Bank and Verzekering, Brussels and Leuven

Led delivery enablement across a five-country setup of roughly 3,000 people.

- Ran the day-to-day management of a 50+ person onshore-offshore organisation on Liquidity Reporting, including performance, development and hiring.
- Coordinated across squads, architecture, testing and programmes, and ran the dependency and risk reviews.
- Owned the delivery KPIs and the SteerCo reporting used by tribe leadership.
- Was the escalation point for delivery blockers, and kept the reporting windows met under Basel IV and AnaCredit.
- Coached the team that delivered Kate Coin, a digital bank coin built under ECB constraints.

Product owner and manager, Carbon Zero

October 2020 to September 2021

UST Global for Uplight, India (team across the US, Canada and India)

Owned a sustainability data product on Google Cloud end to end.

- Turned targets into a live roadmap, release plan and backlog the squads could work from.
- Ran the priority and investment conversations directly with the product director and VP of engineering.

Lead agile business analyst and coach

October 2019 to October 2020

Credit Suisse, India

Led delivery for a counterparty credit risk data team through the post-Brexit changes, in investment banking covering securities and derivatives.

- Removed the blockers and kept the management information and audit artefacts ready for senior risk leaders (over 2,500 people in scope).

Business analyst and agile lead

2018 to 2019

ITC Infotech (AWS Platinum Partner), India and Melbourne, Australia

- Led a Customer 360 delivery for the Melbourne engagements, owning scope, dependencies and release readiness with business and IT.

Systems engineer to senior agile business analyst

September 2013 to October 2018

HSBC, Credit Suisse and Standard Bank, India

- Started in systems engineering and grew into delivery and business analysis on regulated investment banking programmes, including credit risk and market risk regulatory reporting, for HSBC, Credit Suisse and Standard Bank.

Skills and certifications

Delivery and leadership: delivery enablement, agile and hybrid delivery, governance and SDLC, delivery KPIs and dashboards, intake and demand management, dependency and risk management, people management across locations, and working with outsourcing partners.

Certifications: ICAgile ICP-ACC and ICP-ENT, SAFe Scrum Master (SSM) and SAFe Product Manager / Product Owner (PMPO), CSPO from Scrum Alliance, and AIGP from the IAPP.

Domain and technical: investment banking and financial services, including securities and derivatives, counterparty credit risk and market risk regulatory reporting, an affinity for application architecture, cloud (GCP and AWS), and CI/CD and DevOps.

Education

- MBA, Information Technology, RGIMT, 2019 to 2021
- B.E. Information Technology, Savitribai Phule Pune University, 2009 to 2013
- Design Thinking and Digital Transformation, IBMI Berlin, 2021
- AI Regulation and the EU AI Act, TU Delft and KU Leuven

Languages

English (full professional), Dutch (working proficiency), German (basic).
