Available in Brussels from October. I do not need a work permit for Belgium.

I coach agile teams and their leaders, and I lead delivery in large, regulated organisations. Most of my 13 years have been in banking, working with squads, chapters, scrum masters, product owners and chapter leads. I like teams to own their own work, so I set clear expectations, clear the blockers, and coach the people doing it. I run the ceremonies, I do the training and change side of agile adoption, and I will make the unpopular call when it protects delivery.

Experience

Founding director, Agile Center of Excellence

2023 to present

iostring Technology and Consulting, India (running the India operation since September 2025)

I set up the coaching and delivery practice and now run the India side of the business.

- Built the Agile Center of Excellence from nothing, across business operations, product and engineering.
- Coach scrum masters, product owners and chapter leads on both the mindset and the day-to-day mechanics, through communities of practice and a coach-the-coach approach.
- Watch delivery health (cycle time, flow, dependencies) and use it to decide where to help.
- Use AI tools in my own delivery and coaching, and get the teams comfortable using them too.

Enterprise agile coach and program lead

September 2021 to October 2024

KBC Bank and Verzekering, Brussels and Leuven

Coached and led delivery across a five-country setup of roughly 3,000 people.

- Coached squads, chapters and senior leaders, and ran the ceremonies from squad level up to tribe level.
- Led the training and change work so people picked up the new ways of working.
- Owned the delivery metrics that went into SteerCo and leadership reviews for Liquidity Reporting.
- Coached the team that delivered Kate Coin, a digital bank coin built under ECB constraints.

Product owner and manager, Carbon Zero

October 2020 to September 2021

UST Global for Uplight, India (team across the US, Canada and India)

Owned a sustainability data product on Google Cloud end to end.

- Turned targets into a live roadmap, release plan and backlog the squads could actually work from.
- Ran the priority and investment conversations directly with the product director and VP of engineering.

Lead agile business analyst and coach

October 2019 to October 2020

Credit Suisse, India

Kept a counterparty credit risk data team moving through the post-Brexit changes.

- Removed the blockers, and kept the reporting and audit artefacts ready for senior risk leaders (over 2,500 people in scope).

Business analyst

2018 to 2019

ITC Infotech (AWS Platinum Partner), India and Melbourne, Australia

- Delivered a Customer 360 change for the Melbourne engagements, owning scope, dependencies and release readiness with business and IT.

IT business consultant

September 2013 to October 2018

Standard Bank, Credit Suisse and HSBC, India

- Started in systems engineering and grew into delivery and business analysis on regulated banking programmes for several global banks.
